WORK EXPERIENCE

QualityLogic

March 2024 – Present

Boise, ID

Software Test Technician

Core Responsibilities:

- **Problem Solving:** Analyze application functionality for QualityLogic client development teams to collaboratively troubleshoot any existing bugs, along with testing new features being implemented into development.
- **Daily Stand-ups:** Coordinate with the SCRUM team on daily basis to discuss goals and targeted priorities to focus on.
- **Testing Suites:** Create both manual and automated environments, scenarios, and test cases. Working in environments that require both no-code and coded testing scopes utilizing the ACCEL-Q testing suite.

Boise CodeWorks

Aug 2023 – Feb 2024

Boise, ID

Software Development Intern

Core Responsibilities:

- **Special Projects:** Part of a hand-selected team of developers that has worked and continues to work on special projects for CodeWorks.
- **Code Talks & Lectures:** Frequently collaborate with the CEO and other staff in helping set up networking events as well as being a speaker for code talks and lectures to help students understand some of the more in-depth concepts of web development.
- **Alumni Challenge App:** Led the creation of a comprehensive full-stack MEVN app for alumni, facilitating coding challenges with a point, badge, and rewards earning system. Users can engage in various challenges, from mini tasks to full-stack projects.
